AI DINING CONCIERGE

Eat out without the fear

Your AI dining concierge for allergies and diets

Armando Medina · Marco Germanier · Encode 2026

Eating out shouldn't be a gamble

2.4M

UK adults live with a clinically confirmed food allergy

Food Standards Agency, 2024

1 in 100

people in the UK have coeliac disease

Coeliac UK

3×

rise in food-anaphylaxis hospital admissions, 1998–2018

BMJ, 2021

Menus rarely list allergens. Every dinner starts with phone calls, cryptic menus and guesswork. In a group, everyone has a different rule.

From craving to a confirmed table

Find

Nearby places from Google Maps, cross-checked with OpenStreetMap diet tags

Read

Menus from restaurant websites and photos of specials boards

Check

Every dish against the UK's 14 major allergens and your diets

Book

Your Saint agent books the table, after asking you first

You say *“Dinner for two near Shoreditch. One vegan, one shellfish allergy.”*

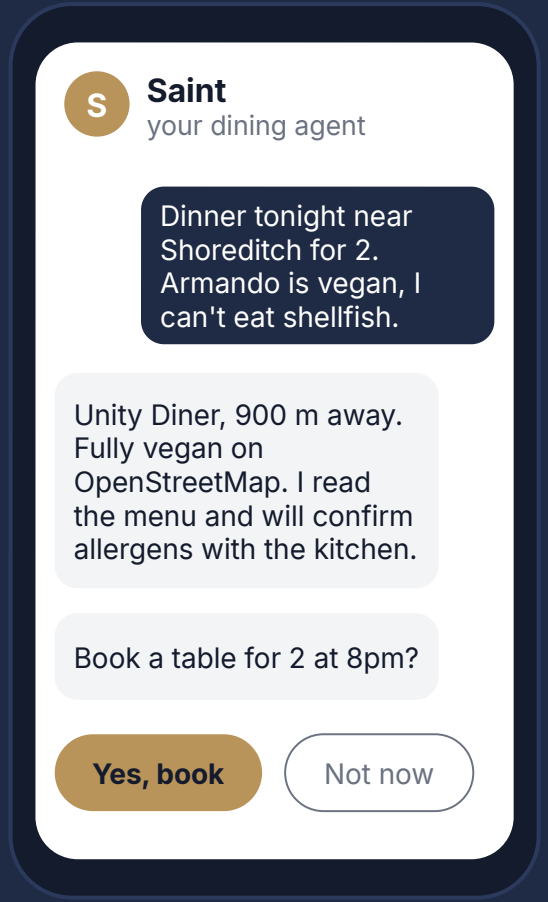

LIVE DEMO

Let's book dinner

> *“Find us dinner tonight near Shoreditch. Armando is vegan, Marco can't eat shellfish.”*

Watch for

- Atlas hybrid search recalls dishes it already knows
- Google Maps + OpenStreetMap find vegan-friendly places
- Menus read and checked against 14 allergens
- Saint asks before it books

MongoDB Atlas is the shared brain

Atlas Search
Full-text over dishes and restaurants

Vector Search
Semantic search on every dish

Automated Embedding
Voyage voyage-4, embedded inside Atlas

Hybrid Search
$rankFusion of text and vectors

Voyage AI Rerank
rerank-2.5 on the fused results

Stream Processing
Menu photos as an event stream (next)

750+

dishes in Atlas, shared by every user

Every menu one person reads makes the next search smarter. Nobody's allergies are stored, only knowledge about places.

Honest, private and in your control

Honest

Unknown never counts as safe. Each place gets a confidence level, or a nudge to ask the kitchen.

Private

We never store anyone's allergies. Your own Saint keeps them and shares them per request.

In your control

Saint asks before it sends a message, books a table or pays a deposit.
